

Performance factors read the signs

This event is being held the last week of March instead of the usual 4th Tuesday. Engine Maintenance and performance monitoring simply lets us look at what we need to expect from our aircraft and the engine. When is the last time you really took a close look at the aircrafts performance on the ground or in the air? You might be surprised at what you find. Aircraft and personal Performance is also affected by an airman's lack of attention to the comfortable or the unseen factors affecting the flight.

Directions: Fargo Jet Center west blue building, west door #2, upstairs.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
